

ROOKERY

The idea

A rook (the chess piece that guards the corners) built from pixel-square blocks, with one lit window.

Fictional example brand. A community of competitive players who also want newcomers to feel welcome. Chess supplies strategy and teamwork; the blocky crenellations nod to pixels; the lime window is the one light left on for new players.

Symbol

Wordmark

Use the horizontal logo by default; the vertical where the space is tall or square; the symbol alone only where the name already appears or the space is under 120 px; the wordmark where a symbol would be redundant.

Clear space and minimum size

Clear space = **x** = 25% of the logo height on every side. Derived from the artwork, adjust after use.

Version	Min. on screen	Min. in print
Horizontal	96 px wide	25 mm wide
Vertical	48 px wide	14 mm wide
Symbol	16 px (use the favicon cut)	6 mm

Starting values. Confirm for this mark with the 16 px / 32 px renders in the favicon test and one real print proof, then update this table.

Greyscale

Full colour is the default. Use the dark-ground version on #12141c and photographs; one-colour versions for single-ink print, engraving, embroidery and stamps. Greyscale is for black-and-white print and checking value contrast.

* CMYK is derived from the screen colour for reference only. A printer must supply values from the paper profile (FOGRA/GRACoL) and proof them.
Contrast chips are WCAG 2.2 ratios for text on that ground.

Don't add shadows or effects

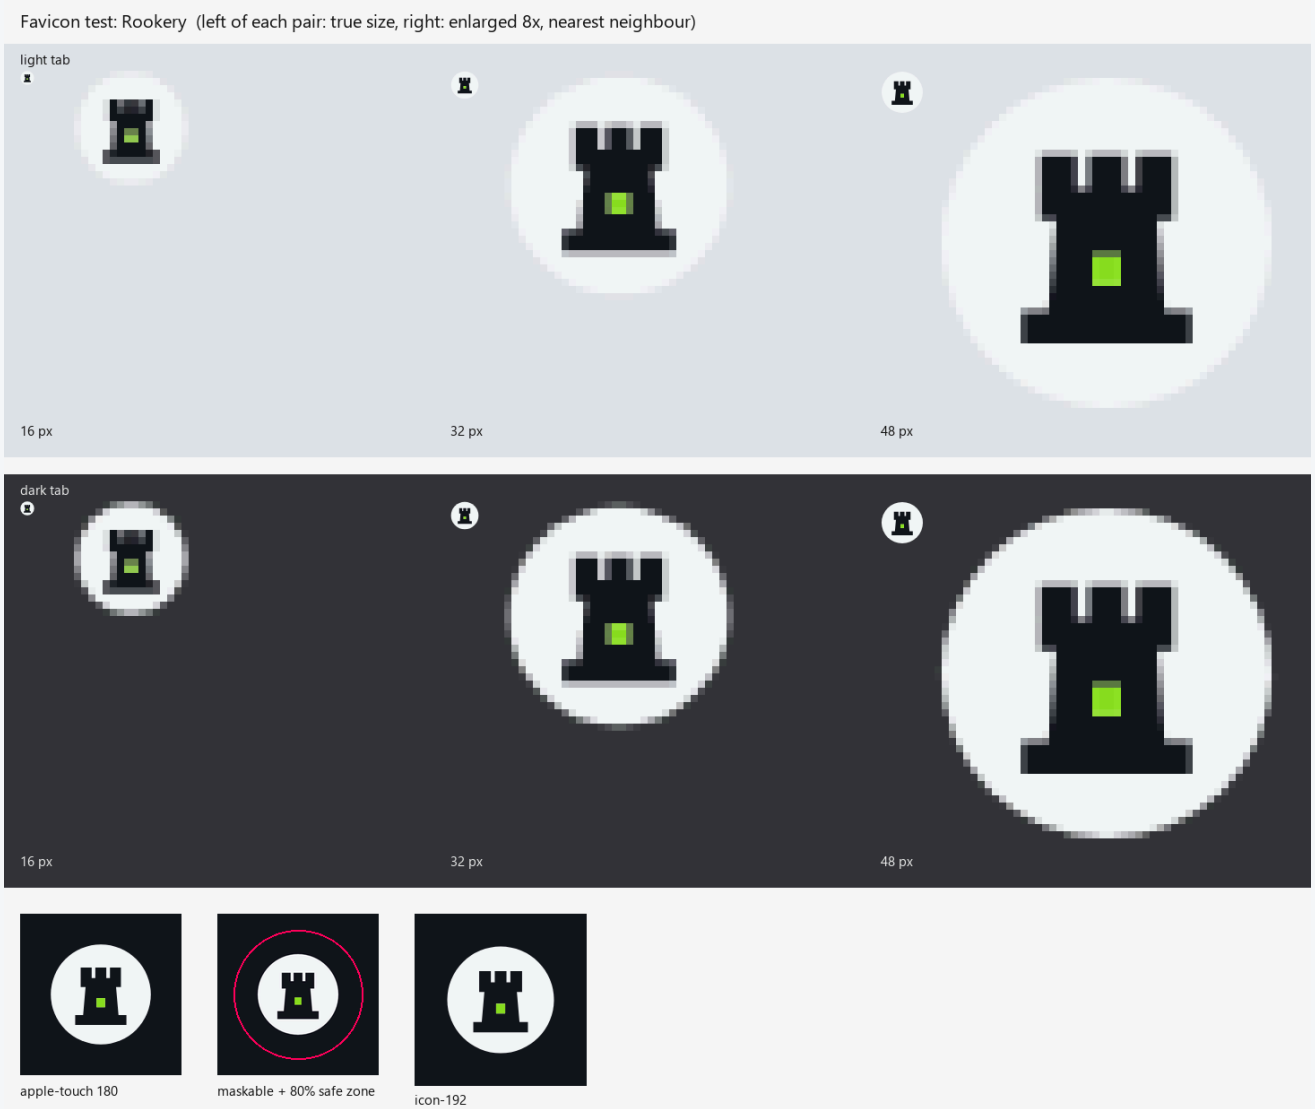

Don't place on low-contrast grounds

Don't mirror or rearrange

Never rebuild the logo by typing the name. Always use the supplied files.

Re: Sample letter

Dear Alex,

This paragraph only shows how body text sits under the header and above the footer. Replace it with the real letter.

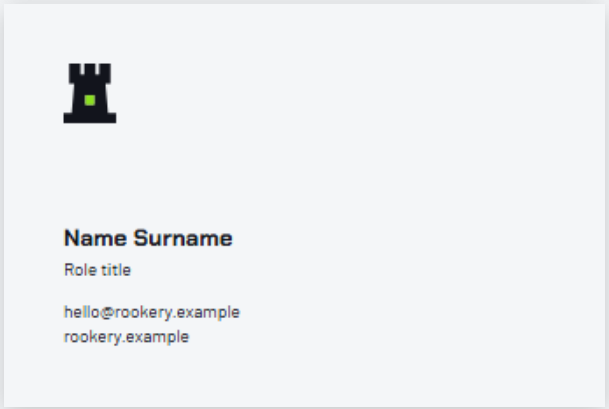

Kind regards,
